

Attendance and Participation: Attendance will be taken at the beginning of every class period. Students are expected to attend class and participate in group discussions.

Weekly Reading Assignment: There will be a reading assignment approximately once per week. Students will be expected to read the week's paper, complete a reading assignment on Canvas, and discuss the paper in class with classmates.

Homework: There will be about five homework assignments and they will be due approximately every other week.

Exams: There will be one in-person exam which will be in-class on **Wednesday, May** .

Short Presentation: Each student will give a short 2–5 minute presentation on a topic related to Sports Analytics of their choosing.

Final Project: Students will complete a final project related to sports statistics either individually or in a small group. Students will be expected to deliver an in-class presentation during the final week of classes and turn in a 5–10 page report.

Basis for Final Grade: Your final grade will be based on your exam scores, weekly homework sets, and intangibles such as class participation. The intangibles can only increase your grade. The weightings will be as follows:

- Homework: 20%
- Reading Assignments: 10%
- Class Attendance and Participation: 10%
- Short Presentation: 5%
- Final Project Presentation and Report: 40%
- Final Exam: 15%

Grading Scale: Your course grade will be determined from the following grading scale:

A	93% – 100%	C+	75% – 80%
A-	90% – 93%	C	70% – 75%
B+	87% – 90%	D	60% – 70%
B	83% – 87%	F	0% – 60%
B-	80% – 83%		

Course Policies:

- **Academic Integrity and CSU Honor Pledge:** This course will adhere to the CSU Academic Integrity/Misconduct policy as found in the General Catalog and the Student Conduct Code. Academic integrity lies at the core of our common goal: to create an intellectually honest and rigorous community. Because academic integrity, and the personal and social integrity of which academic integrity is an integral part, is so central to our mission as students, teachers, scholars, and citizens, I will ask that you affirm the CSU Honor Pledge as part of completing your work in this course. Further information about Academic Integrity is available at CSU's Academic Integrity - Student Resources.
- **Cheating:** This includes using unauthorized sources of information and providing or receiving unauthorized assistance on any form of academic work or engaging in any behavior specifically prohibited by the faculty member. In particular, students are not allowed to communicate with others during exams and are not allowed to use online solutions from any source.
- **Late Work Policy:** Online homework may be submitted up to one week late for half credit. No late homework can be submitted after the final exam.
- **Grades of "Incompletes":** I will follow university procedures on "incompletes", i.e., they are only given in situations where unexpected emergencies prevent students from completing the course and the remaining work can be easily finished the following semester. Incomplete work must be finished the next semester or the grade automatically turns into an F.
- **Group Work Policy:** Students are welcome to work together on homework, but you must submit your own work. You may not use solutions obtained from previous semesters or from online. This is considered academic dishonesty.
- **Students with Disabilities:** The university is committed to providing support for students with disabilities. If you have an accommodation plan, please see me so we can make any arrangements necessary to facilitate your learning.
- **Need Help?** CSU is a community that cares for you. If you are struggling with drugs or alcohol and/or experiencing depression, anxiety, overwhelming stress or thoughts of hurting yourself or others please know there is help available. Counseling Services has trained professionals who can help. Contact 970-491-6053 or go to <http://health.colostate.edu>. If you are concerned about a friend or peer, tell someone by calling 970-491-1350 to discuss your concerns with a professional who can discreetly connect the distressed individual with the proper resources (<http://safety.colostate.edu/tell-someone.aspx>). Rams take care of Rams. Reach out and ask for help if you or someone you know is having a difficult time.
- **COVID:** For the latest information about the University's COVID resources and information, please visit the CSU COVID-19 site <https://covid.colostate.edu/>.

Course schedule: The following schedule of course materials covered is tentative and subject to change.

Weeks	Topics
1 – 2	Introduction to sports statistics, data acquisition, data scraping, accessing sports data via R libraries, data wrangling, summarizing multivariate datasets graphically and numerically
3 – 4	Advanced regression models for sports data, LASSO, Ridge, Elastic Net, Weighted Least Squares, Mixed Models, crossvalidation, issues with multi-year data
5	Logistic regression for inference and classification, field goal models, using Vegas odds to predict game results
6	Principal Component Analysis, application in the analysis of baseball career statistics
7	Classification methods, random forests, win probability models, goal scoring probability models
8	Clustering analysis, PECOTA, player similarity scores
9	Nonparametric statistics, splines, generalized additive models, analysis of historical sports data
10	Analysis of sports drafts, draft pick valuation, historical trends, analysis of NFL combine data
11	Topics in baseball/softball analytics, sabermetrics, player and team valuation, acquisition and analysis of Statcast and Pitch F/X data
12	Topics in football analytics, 4th down strategy, play calling, win probability added calculations
13	Topics in basketball analytics, analysis of play-by-by data, spatial analysis of shot attempts, three point attempt strategy
14	Topics in soccer and hockey analytics, estimation of expected goals, goal scoring probability models
15	Project presentations
